

Exponential Expressions*Independent Set 3.03*

Six questions, on your own, in silence. Show the step that does the work.

1. Find the value. $\frac{4^2 \cdot 4^0}{4^1}$

2. Find the value. $(2^0 \cdot 2^3)^2$

3. Write as one power. $\left(\frac{5^6}{5^4}\right)^3$

4. Find the value. $0.2^2 \cdot (0.2^1)^2$

5. Find the value. $\frac{(-3)^3 \cdot (-3)^0}{(-3)^2}$

6. Show that $\left(\frac{10^4}{10^2}\right)^2$ and $\frac{10^8}{10^4}$ have the same value.
