

Rewriting Numbers in Equivalent Forms

Worksheet 7A.01.01

Name _____

Date _____

Period _____

-
1. Which strategy will always work to rewrite a fraction as a decimal? Fill in one bubble.
 - ☐ Multiply or divide by 100.
 - ☐ Divide the numerator by the denominator.
 - ☐ Create an equivalent fraction with a denominator of 100.
 - ☐ Use the place value of the last digit to determine the denominator.

 2. Which strategy will always work to rewrite a terminating decimal as a fraction? Fill in one bubble.
 - ☐ Multiply or divide by 100.
 - ☐ Divide the numerator by the denominator.
 - ☐ Create an equivalent fraction with a denominator of 100.
 - ☐ Use the place value of the last digit to determine the denominator.

For questions 3 through 5, write each fraction as an equivalent decimal. Use bar notation for any decimal that repeats. Then fill in one bubble.

3. $\frac{5}{6}$ = _____

This is a ☐ terminating decimal ☐ repeating decimal.

4. $\frac{17}{8}$ = _____

This is a ☐ terminating decimal ☐ repeating decimal.

5. $\frac{14}{3} =$ _____

This is a ☐ terminating decimal ☐ repeating decimal.

6. The decimal equivalent of $28/15$ is $1.8666\ldots$. Which of these is $1.8666\ldots$ written in bar notation? Fill in one bubble.

☐ A. $1.\overline{86}$

☐ B. $1.\overline{8}\overline{6}$

☐ C. $1.8\overline{6}$

☐ D. 1.86

7. $\frac{1}{9} =$ _____

Use your answer to question 7 for questions 8 through 10. Predict each decimal equivalent, then check it with your calculator. Use bar notation for every repeating decimal.

8. $5\frac{4}{9} =$ _____

9. $\frac{7}{9} =$ _____

10. Use $101/9$ for parts a and b.

a. Write $101/9$ as a mixed number. _____

b. Write $101/9$ as a decimal. Use bar notation. _____

11. Priya divides 5 by 9 on her calculator. The screen shows 0.55555556 .

a. Is $5/9$ a terminating decimal or a repeating decimal? Fill in one bubble.

- ☐ Terminating.
- ☐ Repeating.

b. Write $5/9$ in bar notation. _____

c. Explain why the last digit on the screen is a 6.
