Real-World Coordinate-Plane Problems; Perimeter

Question Bank 6.06

Name_____
Date_____
Period_____

Show your work. Circle your final answer.

For questions 1 through 4, find the perimeter of the triangle with the given corners. Round to the nearest tenth when it is not a whole number.

1. $(-1, -2)$, $(8, -2)$, $(8, 10)$

2. $(-3, 6)$, $(2, 6)$, $(-3, -6)$

3. $(-2, -3)$, $(4, -3)$, $(4, 4)$

4. $(-5, -2)$, $(5, -2)$, $(0, 10)$ — a triangle with no right angle

For questions 5 through 7, each grid unit is one block or one meter.

5. Home is at $(-6, 2)$ and school at $(3, -10)$. How much shorter is the straight line than the streets?

6. On a park map in meters, a bench is at $(-2, -4)$ and a slide at $(6, -1)$. How far apart are they, to the nearest tenth?

7. How long is a diagonal of the rectangle with corners $(-3, -1)$, $(9, -1)$, $(9, 4)$ and $(-3, 4)$?

Choose one.

8. What is the perimeter of the triangle with corners $(-3, -1)$, $(0, -1)$ and $(0, 6)$, to the nearest tenth?

- ○ A. 10
- ○ B. 17.6
- ○ C. 20
- ○ D. 68

9. How much shorter is the straight path from $(-4, -2)$ to $(5, 10)$ than the path along the grid lines?

- ○ A. 15
- ○ B. 21
- ○ C. 6
- ○ D. 36
