Real-World Coordinate-Plane Problems; Perimeter

Question Bank - Additional 6.06

Name_____
Date_____
Period_____

Show your work. Circle your final answer.

For questions 1 through 4, find the perimeter of the triangle with the given corners. Round to the nearest tenth when it is not a whole number.

1. $(-4, -1)$, $(1, -1)$, $(1, 11)$

2. $(6, -3)$, $(-3, -3)$, $(6, 9)$

3. $(-5, 2)$, $(3, 2)$, $(3, -1)$

4. $(-9, -4)$, $(9, -4)$, $(0, 8)$ — a triangle with no right angle

For questions 5 through 7, each grid unit is one block or one meter.

5. Home is at $(-5, 6)$ and the store at $(7, 1)$. How much shorter is the straight line than the streets?

6. On a park map in meters, a bench is at $(-6, 1)$ and a fountain at $(2, -4)$. How far apart are they, to the nearest tenth?

7. How long is a diagonal of the rectangle with corners $(-4, -3)$, $(5, -3)$, $(5, 9)$ and $(-4, 9)$?

Choose one.

8. What is the perimeter of the triangle with corners $(-1, 2)$, $(4, 2)$ and $(4, -5)$, to the nearest tenth?

- ○ A. 12
- ○ B. 24
- ○ C. 20.6
- ○ D. 86

9. How much shorter is the straight path from $(-3, -5)$ to $(9, 0)$ than the path along the grid lines?

- ○ A. 4
- ○ B. 17
- ○ C. 13
- ○ D. 30
