GRADE 7 ACCELERATED · UNIT 4 · LESSONS 2–3

Multiplying and Dividing in Scientific Notation

Independent Set 4.02 **ANSWER KEY**

Name
Date
Period

Six questions, on your own, in silence. Show the step that does the work.

1. $(2\times10^5)(4\times10^3)$

8×10^8

2. $\frac{9.9\times10^7}{3.3\times10^2}$

3×10^5

3. $(5\times10^6)(6\times10^{-2})$

3×10^5

The product is 30×10^4 *, which is not finished.*

4. $\frac{1.8\times10^3}{6\times10^7}$

3×10^{-5}

The quotient is 0.3×10^{-4} *, which is not finished either.*

5. $\frac{4\times10^9}{8\times10^{-2}}$

5×10^{10}

$9-(-2)=11$ *, and* 0.5×10^{11} *is not finished.*

6. Find n . $(2\times10^n)(3\times10^4)=6\times10^{10}$

n = 6

$n+4=10$.
